

Retrofit-Show

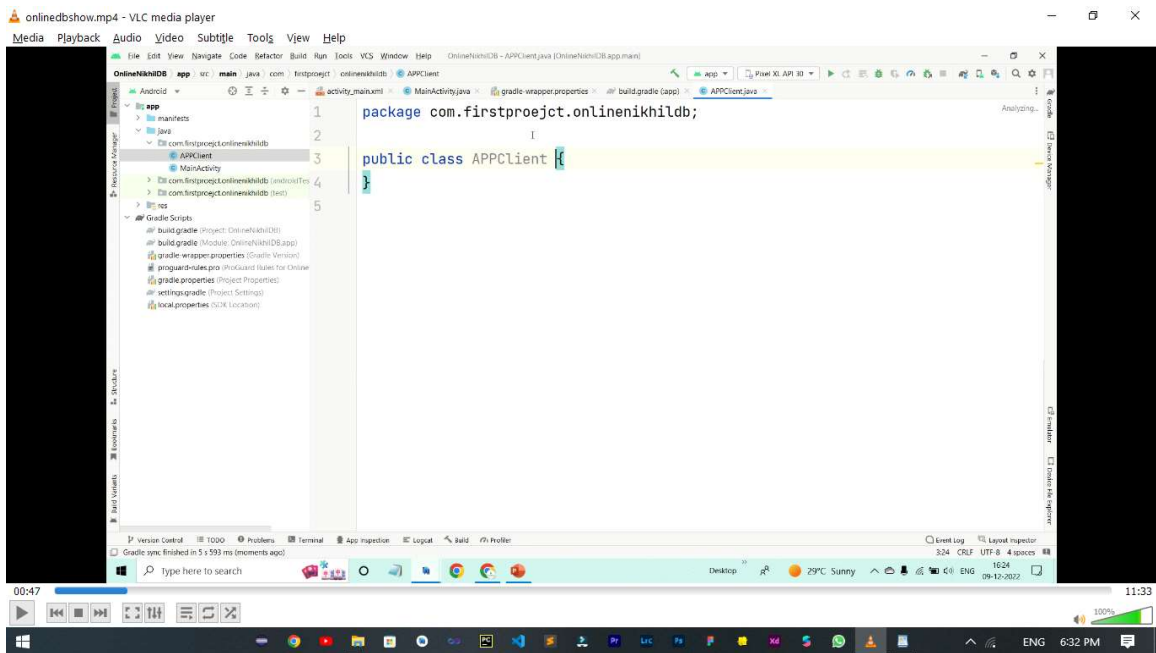

1. gradle file in add dependency

implementation' com.squareup . retrofit2 : retrofit: 2.3.0'

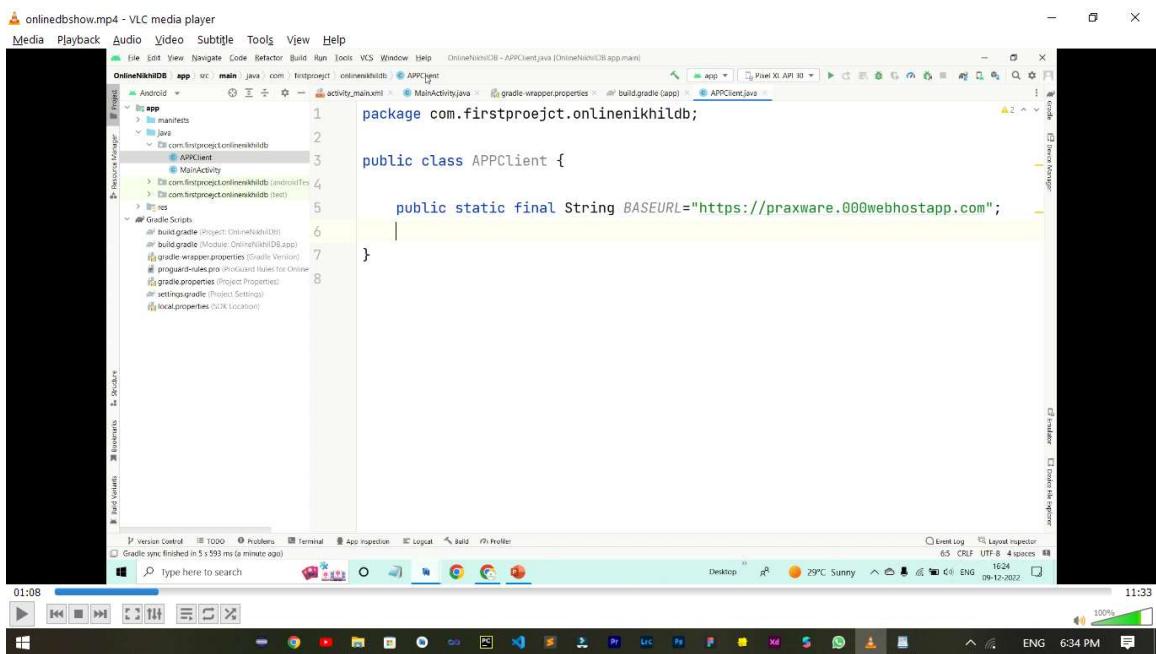

implementation' com.squareup . retrofit2 : converter-gson : 2.3 . 0'

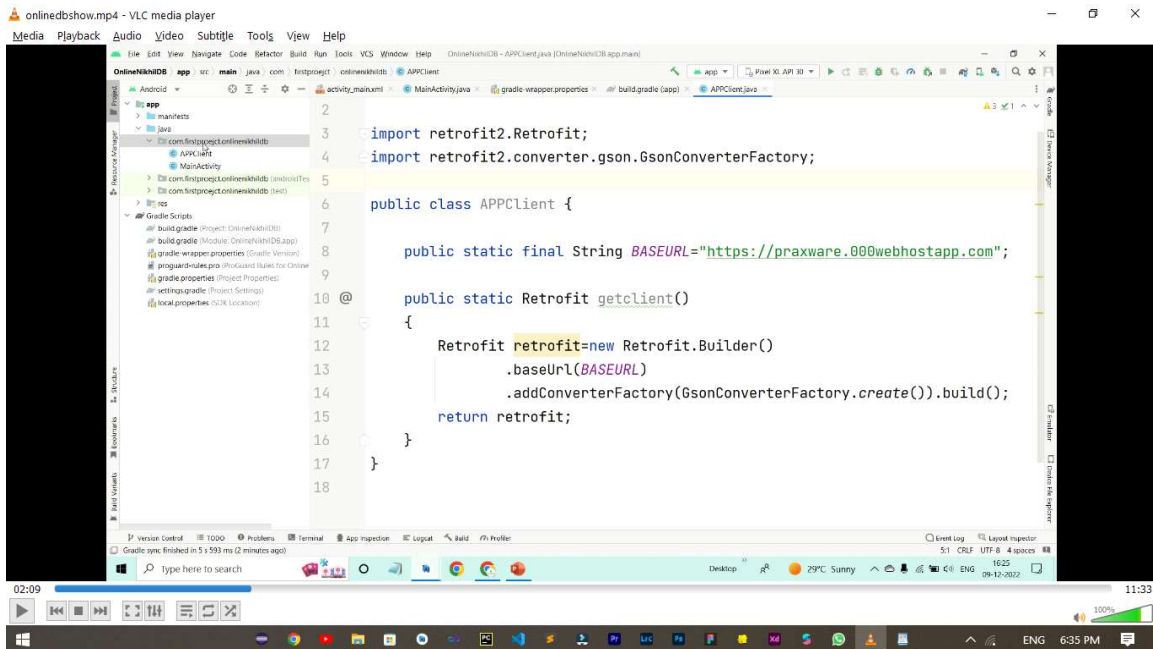

2. Create APPClient Class

3. create base url

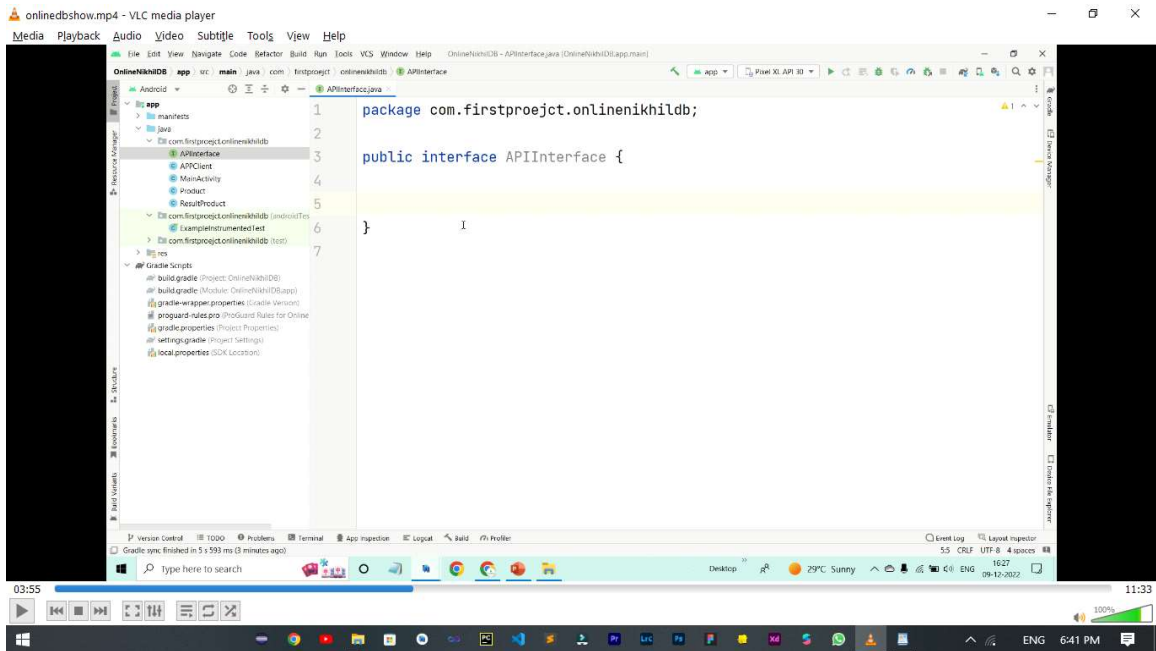

4.create getClient()

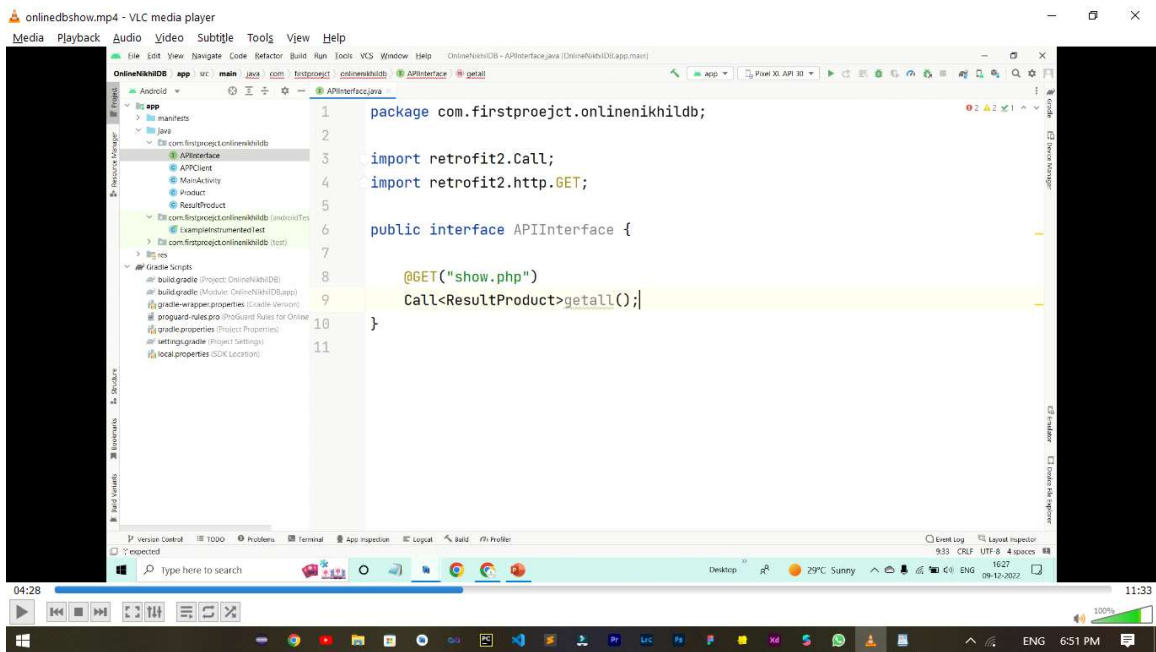

5. json file to getter-setter method

json file copy and jsonpojo website to create getter setter method and give to two file 1.gettersetter 2. array-list result file

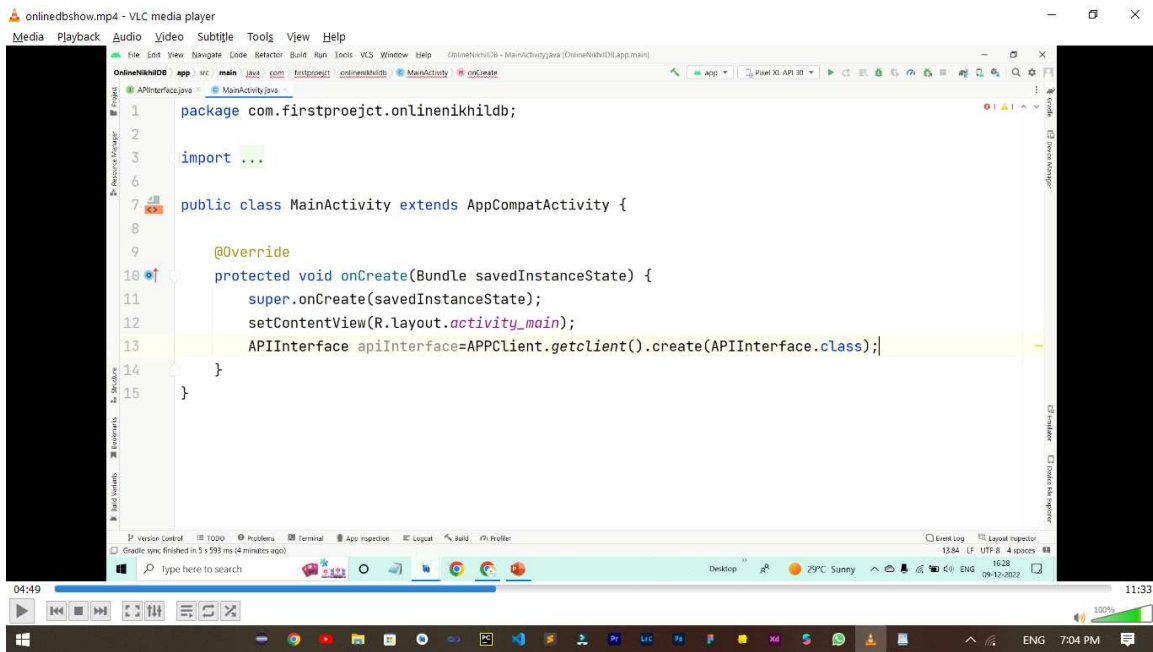

5. create APIInterface

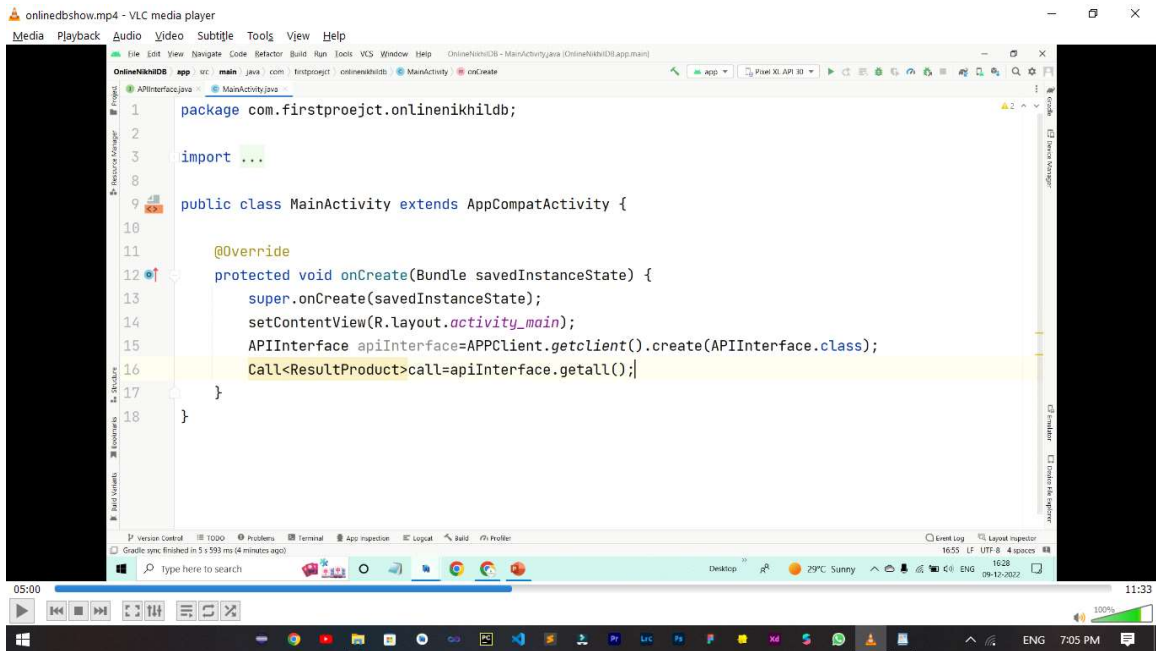

6.create Call method

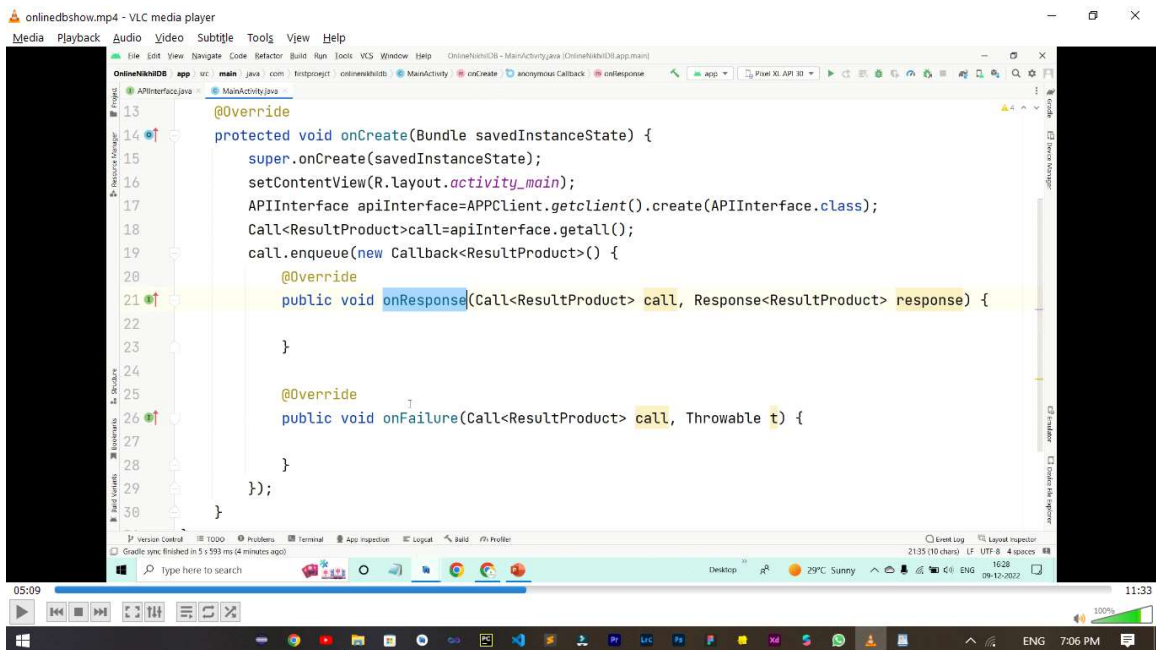

7. api show karvane ke liye apiinterface call

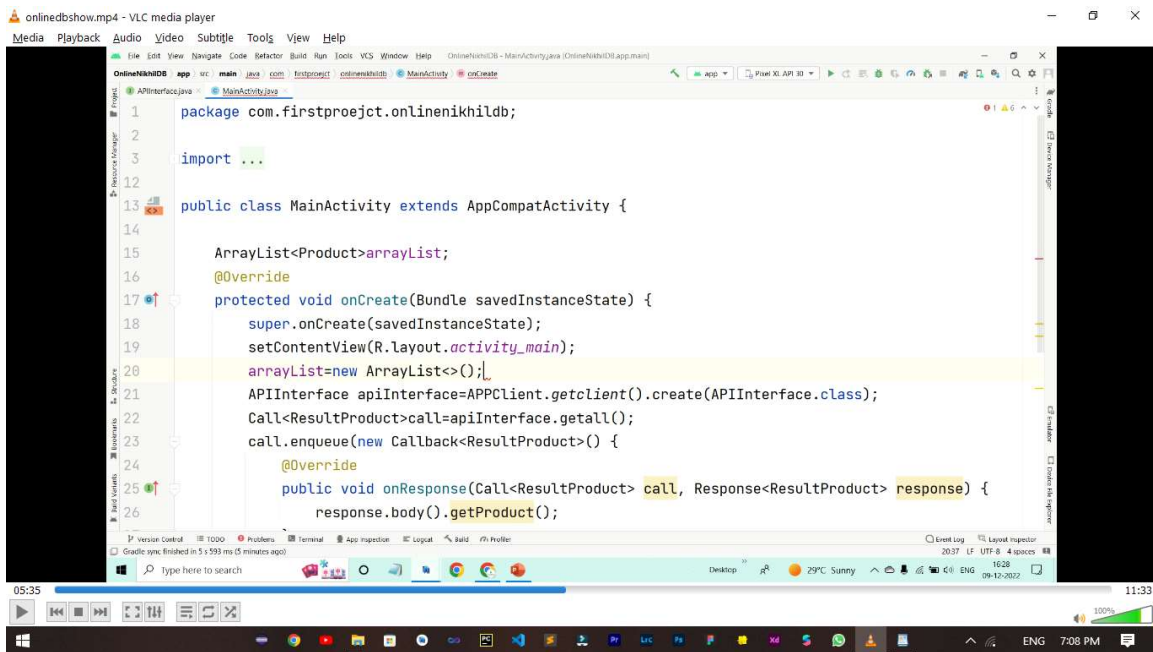

8.call

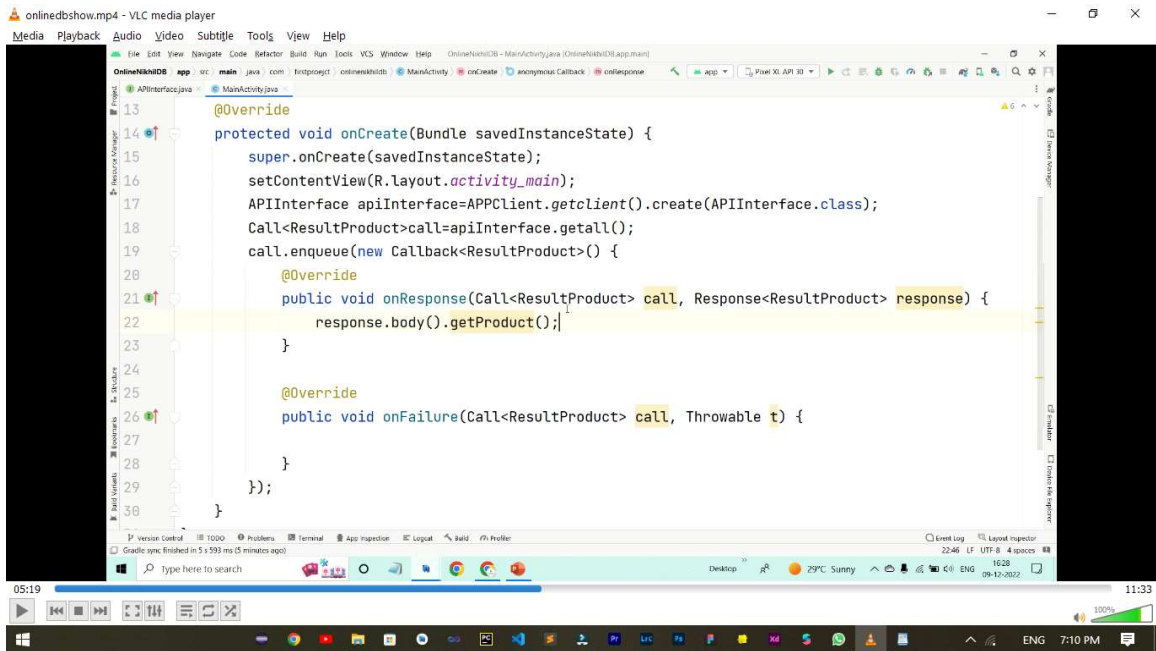

9.enqueue

10. array ko create and initializ (getter setter metod)

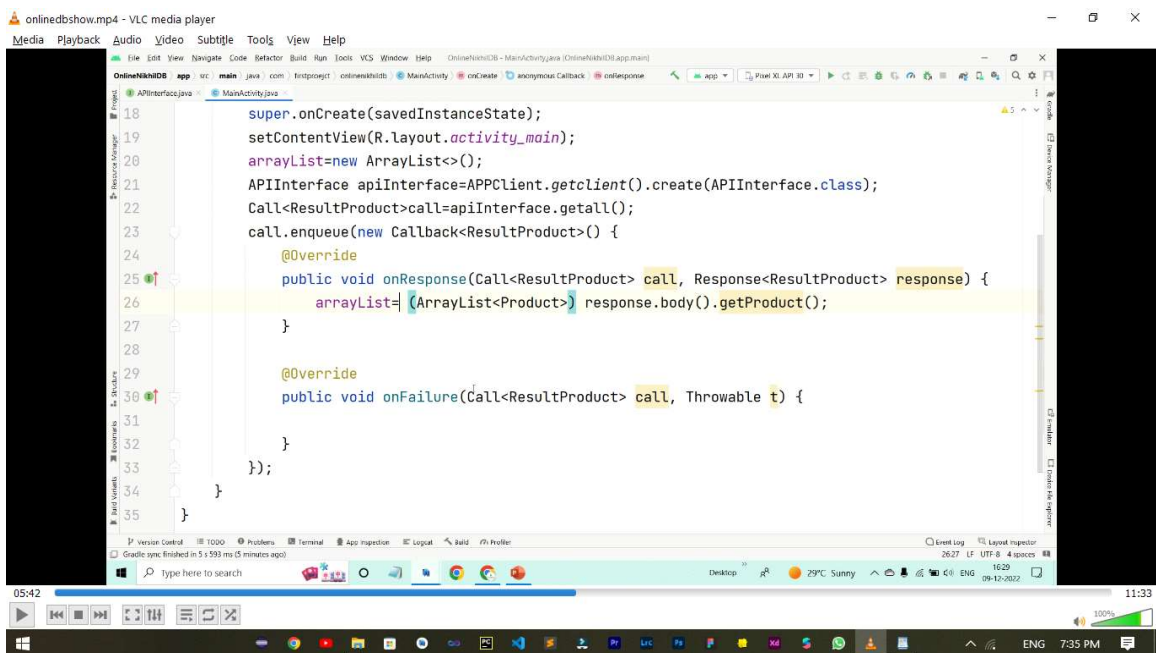

11. reponse.body()

The screenshot shows an IDE window titled 'onlinebdshow.mp4 - VLC media player'. The code editor displays the following Java code for MainActivity.java:

```
13 @Override
14 protected void onCreate(Bundle savedInstanceState) {
15     super.onCreate(savedInstanceState);
16     setContentView(R.layout.activity_main);
17     APIInterface apiInterface=APPClient.getClient().create(APIInterface.class);
18     Call<ResultProduct>call=apiInterface.getAll();
19     call.enqueue(new Callback<ResultProduct>() {
20         @Override
21         public void onResponse(Call<ResultProduct> call, Response<ResultProduct> response) {
22             response.body().getProduct();
23         }
24     })
25
26     @Override
27     public void onFailure(Call<ResultProduct> call, Throwable t) {
28     }
29 }
30 };
```

The bottom status bar shows the time as 05:19 and 11:33.

The screenshot shows the same IDE window, but the code editor displays the following Java code for MainActivity.java:

```
18 super.onCreate(savedInstanceState);
19 setContentView(R.layout.activity_main);
20 arrayList=new ArrayList<>();
21 APIInterface apiInterface=APPClient.getClient().create(APIInterface.class);
22 Call<ResultProduct>call=apiInterface.getAll();
23 call.enqueue(new Callback<ResultProduct>() {
24     @Override
25     public void onResponse(Call<ResultProduct> call, Response<ResultProduct> response) {
26         arrayList.add(response.body().getProduct());
27     }
28
29     @Override
30     public void onFailure(Call<ResultProduct> call, Throwable t) {
31     }
32 }
33 };
```

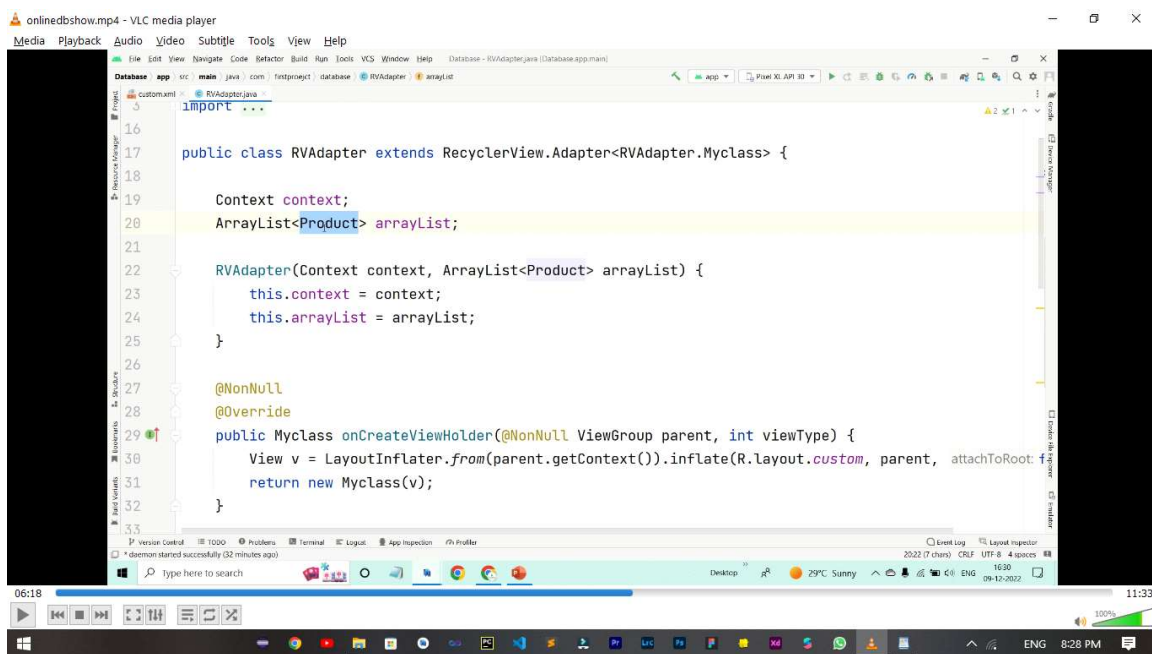

The bottom status bar shows the time as 05:42 and 7:35 PM.

ab json display ke liye

method

12. create custom adapter
xml and java

13. adapter same hi rahe ga
par constructor change hoga

13.onbindviewholder data

set kare

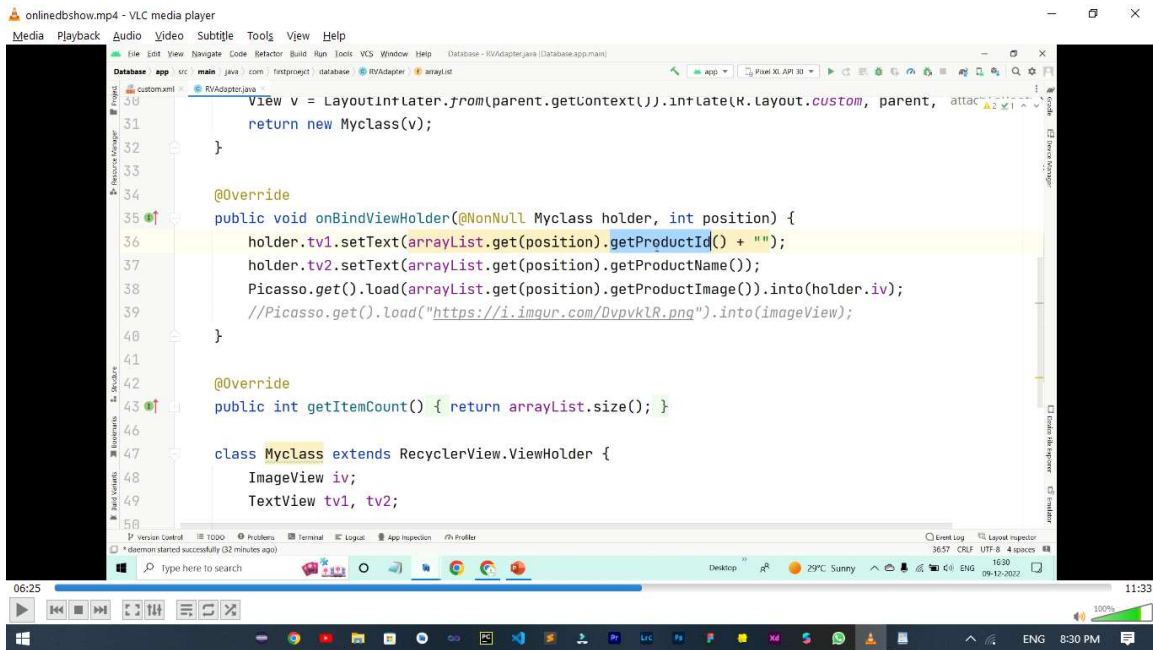

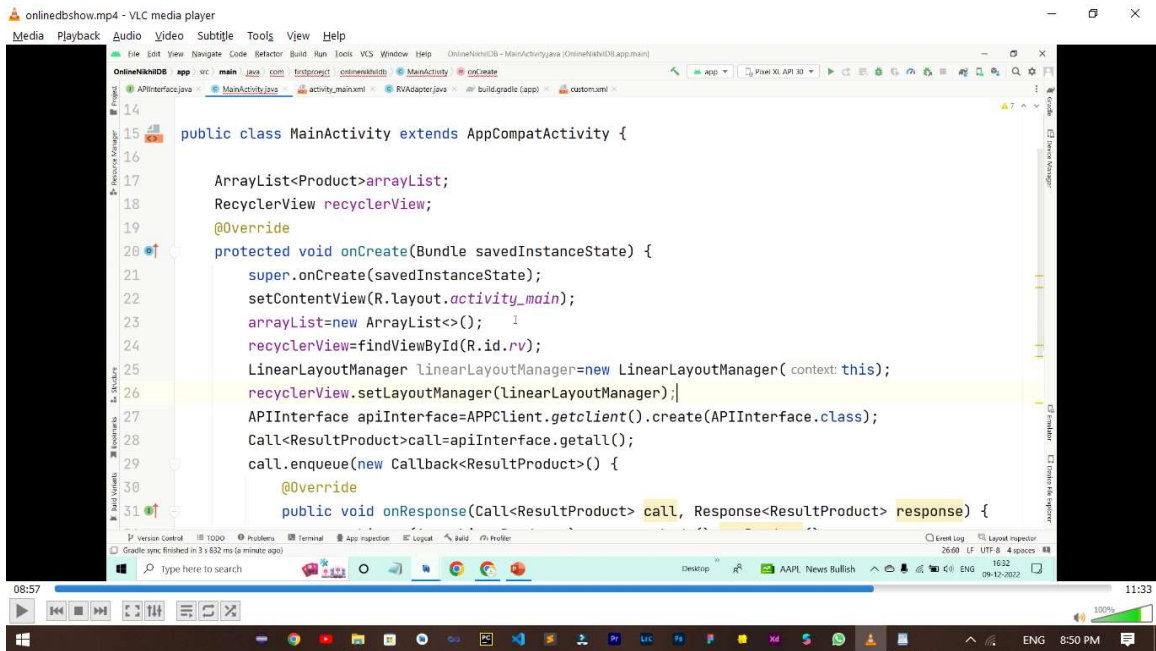

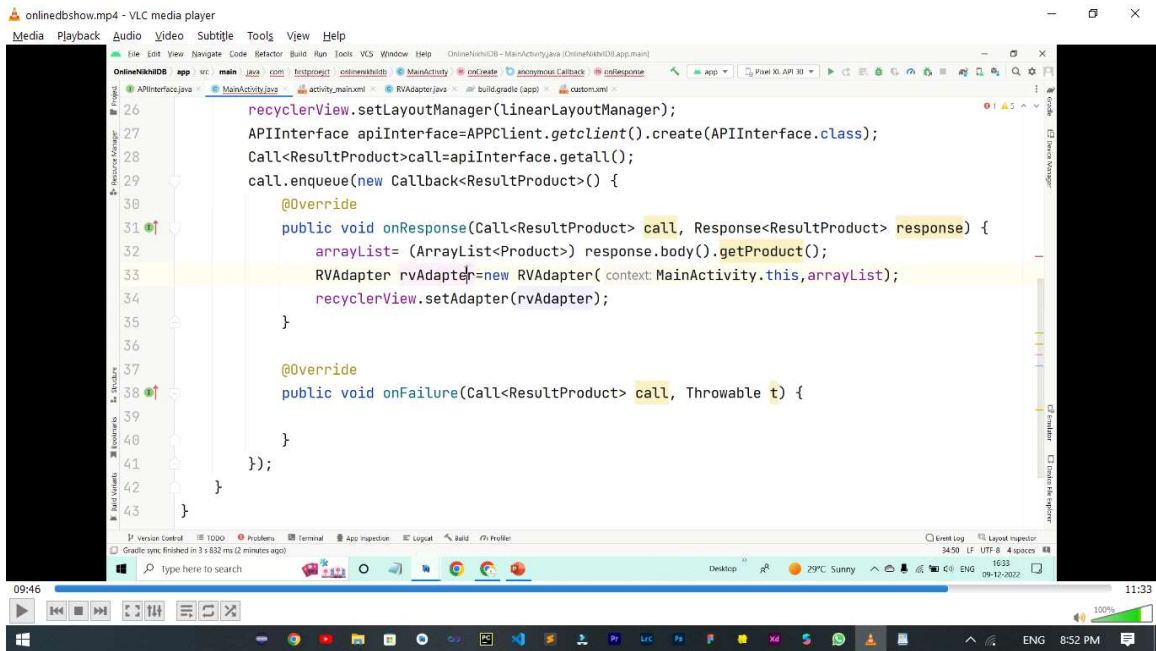

image show karne ke liye picasso library add kare

14. main.java mai RecyclerView difine and findbyid

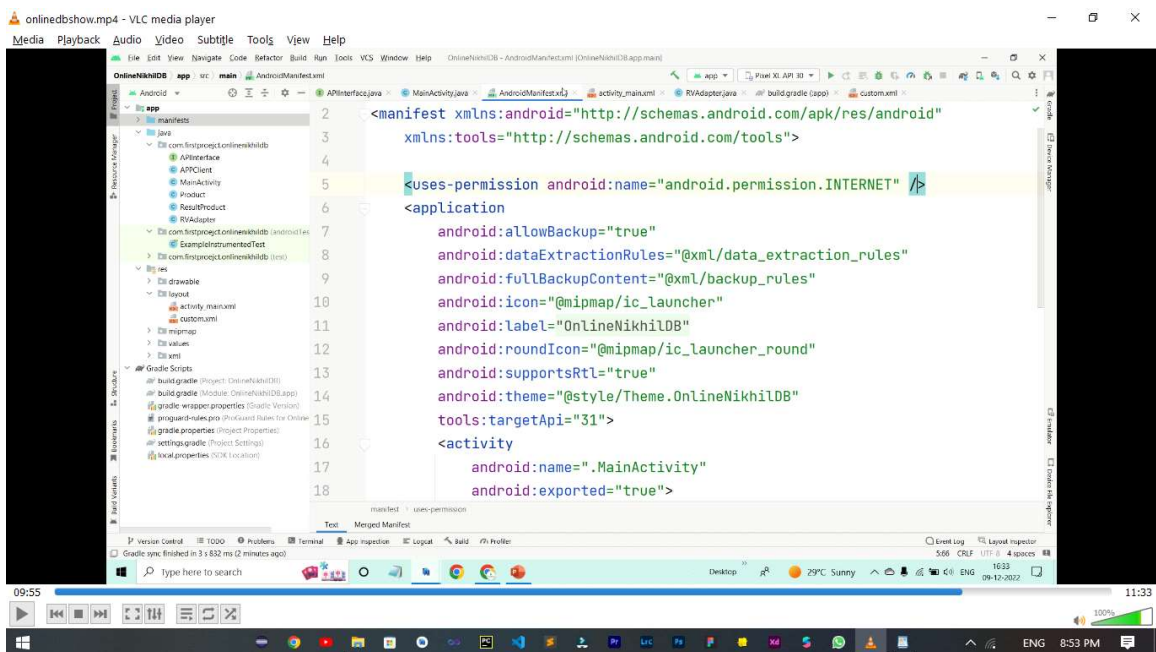

15. set LinearLayoutmanager

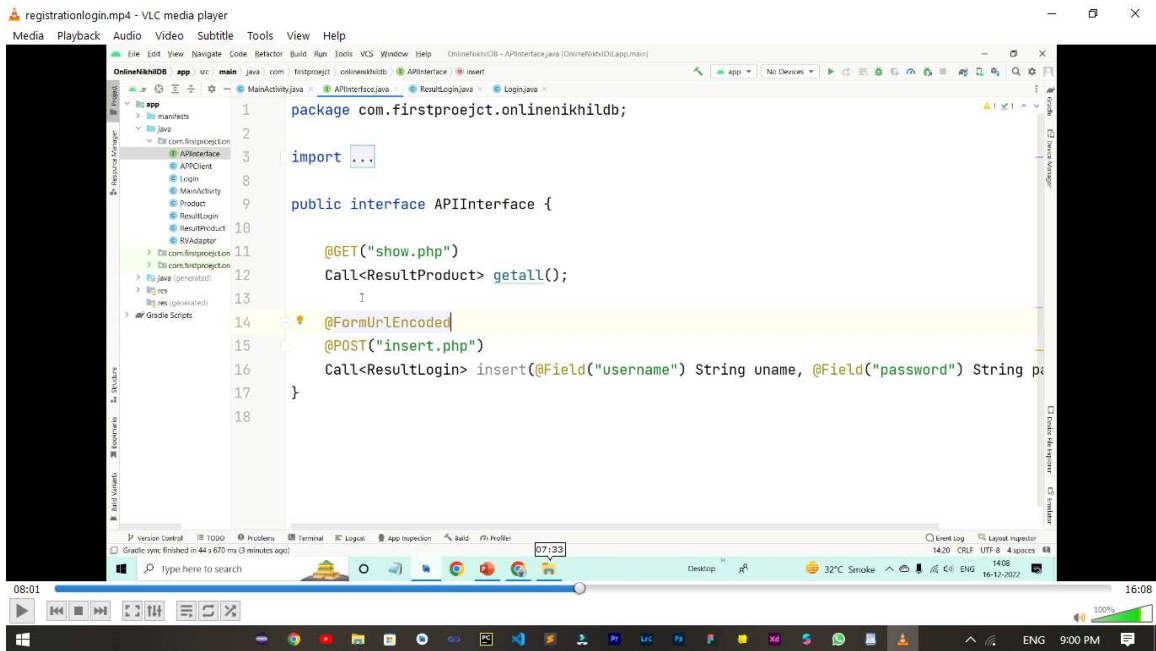

16. eneqe mai adapter ko
call kare

17.set internet permission

/* data insert ,update , check
ke liye api interface mai
change rahega
@FormurlEncoded

getstring se data get karna
hoga or method mai
parameter pass karna hoga
